**DETAILED ACTION**

***Acknowledgment***

1. This Office Action is responsive to the Amendment filed on 6/29/2007.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (US 2003/0128769).

Regarding claims 1-4, 6-8, 10, 15, 16 and 20, Kim, as shown in figures 3-9, teaches a MIMO communication system and method in which the data is encoded into systematic part and parity part (non-systematic part) and each of the systematic part and non-systematic part are assigned to the respective antenna based on the condition of the channels (channel qualities). See [0010], [0011], [0030] – [0034], [0046], [0051] – [0056], [0069], [0073] – [0083].

Regarding claim 5, Kim further teaches the encoder (60) is a turbo encoder. See [0010] and [0076].

Regarding claim 9, Kim further teaches the communication system is pursuant to 1xEV-DV. See [0005].

Regarding claims 11-14, 17-19, Kim further teaches the receiver provides the channel condition to the transmitter. See [0010], [0011], and [0091] – [0093].

### ***Response to Arguments***
